EXAMINER'S COMMENT

DRAWINGS

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the reference characters 7, 15, 52, 54, & 76 which are not mentioned in the specification.

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to this Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d).

REASONS FOR ALLOWANCE

The following is an Examiner's statement of reasons for allowance:

Claim 1 has been found to be allowable over the prior art because the prior art fails to teach or suggest a method of manufacturing an x-ray detector sensor array for use with CT systems by forming an absorption array having a plurality of absorption cells from a high density material as claimed and coupling a thermal sensing array having a plurality of thermal sensing cells to the absorption array.

Claims 2-6 have been found to be allowable due to the claims' dependency on claim 1.

Claim 7 has been found to be allowable over the prior art because the prior art fails to teach or suggest a CT detector array manufacturing process comprising the steps of:

pixilating the block, as claimed, to form a plurality of x-ray absorption component cells;
and

affixing a plurality of thermal sensing cells formed in an array to the plurality of x-ray absorption component cells.

Claims 8-13 have been found to be allowable due to the claims' dependency on claim 7.

Claim 14 has been found to be allowable over the prior art because the prior art fails to teach or suggest a method of CT detector manufacture, the method comprising the steps of:
etching a sheet of x-ray absorption material such that an array of absorption components is formed; and
coupling an array of thermal sensing components to the array of absorption components.

Claims 15-20 have been found to be allowable due to the claims dependency on claim 14.

Any comments considered necessary by the Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
